

New AIRTIGHT containers

colorclip Vision

Greater transparency
Greater strength

And the same top
quality for 20 years

araven Colorclip have been present in the most prestigious international kitchens for 20 years

All of the usual benefits...

... and now much more

Food identification system

Label integrated in the container in compliance with traceability regulations, control of packing date, preparation and pre-preparation. Does not generate additional costs or waste as adhesive identification labels are not required.

colorclip Identification of the type of food to be preserved, ensuring that the contents are always of the same nature, thus avoiding cross-contamination.

Araven Horeca Marker

Writes directly on label.
Non-toxic ink.
Abrasion resistant.
Resistant to cold room condensation.
It is easily removed.

Before

Now colorclip Vision

GREATER TRANSPARENCY The new Colorclip airtight containers allow quick identification of food and its state thanks to their greater transparency.

Would you risk using a GastroNorm container other than Araven?

It has a double airtight seal that guarantees total protection of food.

Sin BPA
BPA Free

How much food is there in the container?

They include a measuring scale for perfect control of stocks.

araven ColorClip airtight containers allow food to be preserved with full food hygiene guarantees.
